

# SOLANKI HEMANG

Aspiring Full stack web developer | Front-End Specialist

## PROFILE

With a focus on front-end development, I specialize in building visually appealing, responsive, and user-friendly websites. My background in Computer Engineering and Full-Stack Development has equipped me with the technical skills needed to design and develop high-quality web applications. I am known for my strong problem-solving abilities and innovative thinking, consistently delivering results that meet both client and user needs. As I prepare to begin my career, I am eager to contribute my creativity, technical expertise, and passion to a dynamic web development team, helping to create impactful digital solutions that stand out in the market.

## EXPERIENCE & PROJECT

### ● Amazon Clone |

This Amazon clone is developed using HTML, CSS, and JavaScript, replicating the core functionalities of the original platform. The site features a responsive layout with product listings, a search bar, and user-friendly navigation. Key functionalities include search, filtering by categories, price, and ratings, along with sorting options to arrange products by price, relevance, or popularity. Users can easily browse and find products based on their preferences, offering a seamless and interactive shopping experience, similar to Amazon's interface.

### ● Nike Clone |

This Nike clone is developed using HTML, CSS, and React JS, offering a responsive and dynamic e-commerce experience. The site features product listings with key functionalities such as search, filtering by categories, price, and sorting by popularity or price. Leveraging Redux for state management, the application fetches product data through API integration, ensuring real-time updates and a smooth user experience. Users can browse, filter, and sort products efficiently, providing an intuitive shopping interface similar to Nike's official site.

## CERTIFICATIONS

- Webcare infotech certificate
- TechWar 2024 Certificate
